

## THE DAY IN WALL STREET.

**Trading Done.**

**In Demand at Low Rates.**

of the Sherman Silver act grow brighter the market for silver seems to improve in equal ratio.

Reporters that the silverites have taken the bull by the horns and are fighting against the repeal of the Sherman act have had many to believe that such action would be a mistake. They are inclined to wait until the silverites have had time to follow immediately upon its use.

the substance of the general opinion of the country, and the fact that the silver advocates will only result in the certain repeal of the act.

There is more than a month before Congress meets, and as the object lessons of Secretary Carter's report are in full view, it is probable there is no telling what developments will marshall which will render the repeal of the present law even the part of it that has not been deemed.

The action of the Cleveland-Houston Committee has undoubtedly had a most beneficial effect in relieving the extreme stringency of the money market, and it is believed that the issue of certificates may be necessary before the full effect is brought to bear on their return call, and the rates of interest down to the normal point.

The attendance of brokers and operators at the Stock Exchange was unusually large, and it is probable that the closing of last week to be absent over the National holiday.

It is rumored from Washington that the Treasury will make no silver purchases to-day.

The total east-bound shipments from Chicago by the Trunk lines last week were 47,409 tons, against 53,246 the previous week and 60,111 tons for the corresponding week in 1892.

The fluctuations were narrow, and the transactions were nearly all in small lots.

Money was easier later in the day, lending at 10 a 15 per cent.

It is probable that the shipments of currency to the interior to-day will aggregate \$300,000 to \$350,000.

In the afternoon stocks were firmer and recovered a part of the early decline. Speculation was favorably influenced by

lower rates for money on call. The dealings, however, continued small, and only a languid interest was taken in the trading.

Loan certificates for \$2,885,000 were issued to-day by the Clearing-House, making the total to date \$21,665,000. The Sub-Treasury held out to-day \$1,000,000.

Sub-treasury paid out to-day about \$1,000,000 in currency. This is chiefly for use by savings banks. The credit balance at the Clearing-House Saturday and to-day is explained by the fact that interest checks held by the banks are being presented for payment over the counter. A despatch from Boston says

The steamship Havel, sailing for Europe to-morrow, will take out 550,000 ounces of silver, shipped by the following firms: Zimmermann & Forshay, 150,000 ounces; J. & W. Seligman & Co.

The exports, exclusive of specie, from the port of New York for the week were \$7,158,417, against \$6,020,121 for the corresponding week last year, and from Jan. 1 to date, \$176,157,696, against \$160,000,000.

The surplus earnings of the Atchafalaya system for the month of May were \$40,151, an increase of \$156,623.

The sales of stocks reached the small total of 77,400 shares. Silver was traded in to the extent of 60,000 ounces. In the unlisted department 4,900 shares of Sugar and 1,100 Lead were traded in.

The recent heavy selling of Atchafalaya securities is credited to C. P. Huntington, who is reported to have sold at least 10,000 shares of the stock. He received about 20,000 shares in exchange for St. Louis & San Francisco when it was taken into the Atchafalaya system.

that the lending plan Sprey & C  
\$1,000,000 is not true. The payment was  
in the neighborhood of \$500,000, and was  
furnished by friends of the company as  
a loan pending the carrying out of a  
other plan which is under considera-  
tion.

The St. Paul & Minneapolis Trust Co.

The stockholders of the closed Queens City Bank, of Buffalo, N. Y., have unanimously voted to resume business as soon as possible.
